

MT. STERLING ADVOCATE.

VOLUME XXVII.

MT. STERLING, KENTUCKY, TUESDAY, AUGUST 14, 1917.

NUMBER 7

LOCAL BOYS GET COMMISSIONS

All Four of Mt. Sterling's Representatives at Ft. Benj. Harrison Receive Commissions.

The Mt. Sterling boys at Fort Benjamin Harrison who attended the first officers' training camp, certainly did themselves proud and were recognized by the military authorities in charge as being young men of superior qualifications, and of the four who attended from this city every one received a commission. Mr. William French, son of Judge and Mrs. H. R. French, who has been engaged in a bank at Frankfort for the past several years, headed the list of local candidates and was commissioned a First Lieutenant in the National Army. Mr. Thomas Grubbs, son of Hon. and Mrs. Chas. D. Grubbs, who has been attending the University of Kentucky at Lexington for the past several years, was named a Second Lieutenant in the Infantry. Mr. Stanley Brown, son of Mrs. Martin Brown, was commissioned a Second Lieutenant in the Quartermasters' Department, and was sent to Chicago, where he will take another month's training, and at the end of such time it is quite likely he will receive a higher commission. Mr. Samuel McCormick, son of Judge and Mrs. G. A. McCormick, who has been engaged in the lumber business in Lexington for the past several years, was also given a Second Lieutenantancy. Mr. L. V. Morrell, a tobacco man from North Carolina, was the only man registered from this city who failed to receive a commission.

Mt. Sterling and Montgomery county are indeed proud of the splendid record made by her deserving sons, and the Advocate takes this opportunity to congratulate each one, and we desire them to know their future records will be watched with much interest.

MISS DUTY BECOMES BRIDE

Miss Mary Lyle Duty, daughter of Mr. and Mrs. Bruce P. Duty, of this city, surprised her many friends and relatives here Saturday when she was married to Mr. George Stapleton, the wedding ceremony being performed at the Methodist church parsonage in the Clark county capital. Mr. Phelps Renick, Mrs. Scott Renick and young niece, Priscie Maphet, and Mrs. G. W. Banks were present for the ceremony.

The bride wore a stylish blue tailored suit, with a stunning hat to harmonize, and made a dainty and attractive appearance. She is a twin sister of Mrs. Phelps Renick, of Winchester and is one of the most attractive and charming girls in the Bluegrass and has a host of friends here who will be interested to learn of her marriage, and who will join us in extending hearty congratulations and best wishes.

Mr. Stapleton is the only son of Dr. and Mrs. J. W. Stapleton, of Winchester, and is a member of a prominent family. He has a pleasing personality, and is popular with everybody.

After the ceremony, Mr. and Mrs. Stapleton left in a motor car for Louisville, being accompanied by Mr. Phelps Renick, to see the bride's sister, Mrs. Renick, who is ill in a hospital there. They will return to Winchester Tuesday, and will make their home in that city.

SIX LOCAL BOYS CALLED TO NEXT OFFICERS' CAMP

Mt. Sterling fared well in the next Officers' Reserve Camp, which starts at Fort Benjamin Harrison Monday, Aug. 27th. Five local boys, C. T. Coleman, H. W. Lockridge, S. D. Gay, Tom Hamilton and Ollie McClure have received calls to report on the above mentioned date. Mr. Ratliff H. Lane received an alternate call and he is almost sure to get in the camp also. The gentlemen are all high class young fellows in every particular and represent the flower of Montgomery's young manhood, and we predict and confidently believe, they will all make an enviable record.

SPLENDID VICTORY

County Attorney Earl W. Senff won a splendid victory for County Judge in Montgomery. He beat Judge W. O. Chenault by over 500. —Winchester Courier.

FINGER ACCIDENTALLY

SHOT OFF

Walter Curtis, son of Joel Curtis, had his initial finger on his right hand shot off while hunting squirrels at his home near Judy Sunday morning. The wound was dressed by Dr. J. F. Lockhart and the young man is getting along nicely. Just how the accident occurred is not definitely known—but the rumor that the occurrence was intentional is without foundation.

NO CONTESTS TO BE FILED

Report of Contemplated Contests Prove Unfounded, as Time Has Elapsed.

Since the recent primary reports have been in circulation to the effect that one or more contests might be filed, such action being predicted on the part of Mr. Richard P. Winn, defeated candidate for Sheriff, and hinted at in one other race.

Under the law any person desiring to file a contest must serve notice of contest upon the successful candidate within five days from the time the Election Commissioners shall have awarded the certificate of nomination to such successful candidate. The Commissioners met last Tuesday as was required by the statute and issued certificates to the winners. It will therefore be seen that the time in which a contest can be filed has expired.

Frank O. MacNeill, of Winchester, who was engaged to teach in the City High School, has been accepted for the second Officers' Training Camp at Fort Benjamin Harrison and has notified Superintendent Hopper of that fact. His successor has not yet been chosen.

LITTLE PROSPECT OF PEACE

We hear much of the desire of the warring nations for peace, especially Germany and Austria, and nothing could give the people of this country greater satisfaction. But a glance at conditions as they are will convince the most optimistic that peace is still a long way off.

In the first place, the map of Europe and other parts of the world has been much changed since this war began. While Germany has lost her colonial possessions, she has occupied other territory which, in the event she can hold it, will doubtless mean more to her than that which she has lost. Great Britain will scarcely consent to relinquish the Germany territory she has conquered, nor will France make peace without a restoration by Germany of Alsace-Lorraine. Japan has Kia-Chan, taken from Germany, and German armies are overrunning large portions of Russian territory.

Again, there has been no intimation that either the Central or entente powers would agree to a peace without indemnity. And the matter of indemnity is a mountain of difficulty in the way of peace negotiations. Billions have been spent by each side, and the best blood of all the nations has been spilled. That each would contend for indemnity unless conquered outright there can be no shadow of doubt. That neither would even think of granting indemnity there can also be no doubt.

With this state of affairs prevailing, and with the greatest bitterness and hatred existing that the world has ever experienced, it looks as though the only hope for peace is a clean victory for one side or the other.

That being the case, what is the condition facing the allies?

First, it must be admitted that

Germany is far from an exhausted nation, however much we may hope that such is the case. The tenacity with which she holds to her position in the face of staggering onslaughts of the French and English is ample proof of this.

Again, it becomes more apparent each day that little reliance can be placed in Russia as a positive, aggressive force. She may keep up a semblance of offensive, but unless she greatly improves, that will be all. She has too many forces within her borders pulling in different directions. In time she may harmonize these, but it will take time, and her aid is needed now if it is to be of any benefit.

Viewed from whatever angle we may view it, the conflict narrows down to a fight to a finish, with the United States as the deciding factor.

And to be such deciding factor, she must throw such a force across the waters as shall by sheer numbers make a successful resistance by Germany no longer possible.

Every loyal citizen of this country will dedicate his services and his life to this purpose. The man who at this time seeks to place obstacles in the way of the government is not worthy the citizenship he enjoys, and should be forever deprived of it.

There is absolutely no use in this country for the obstructionist.

The Advocate for printing.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

OUT OF THE GLOOM

Many a Gloomy Countenance in Mt. Sterling Now Lightens with Happiness.

A bad back makes you gloomy. Can't be happy with continual backache.

The aches and pains of a bad back Are frequently due to weak kidneys.

Doan's Kidney Pills are recommended for weak kidneys.

So Mt. Sterling citizens testify.

Mrs. W. T. Atchison, 43 East High street, Mt. Sterling, says: "I used Doan's Kidney Pills with benefit when my kidneys were out of order and I had dull backaches and soreness across my kidneys. I had frequent dizzy headaches, also and my kidneys did not act regularly. Doan's Kidney Pills restored my kidneys to good order."

RUSH TOBACCO TO TROOPS IN FRANCE, SAYS CABLE APPEAL

The Red Cross has just received the following cablegram from its French commission in Paris:

"Please arrange ship 10 tons tobacco earliest date; 60 per cent. cigarette mixtures; 20 per cent. pipe tobacco; 20 per cent. chewing tobacco. For use of troops. No suitable tobacco obtainable here. Supply American tobacco exhausted. Y. M. C. A. shipment lost. Prompt shipment important."

The war council plans, therefore, to avail itself immediately of a very generous offer of Messrs. Liggett & Myers Tobacco Co., to donate through the Red Cross for the use of American troops abroad, 1,500,000 cigarettes, twenty thousand 5-cent packages of smoking tobacco, and ten thousand 10-cent cuts of chewing tobacco.

A large consignment of tobacco is accordingly to be forwarded immediately, the French Government having arranged to admit free of duty all articles consigned to American troops. This allows free entry for chocolate, tobacco, cigarettes, games, playing cards, and other "comforts."

BRITISH COMMANDEER FLOUR MILLS

The following cablegram has been received from the American vice consul at London:

On April 30 food controller took over all flour mills in United Kingdom except those with output of less than five sacks per hour. Now all smaller mills and every provender and grist mill connected with any flour mill are also taken over.

In this day and time if you had all the Wisdom of Solomon the world would walk away from you and say you were Talking Through Your Hat.

Why Suffer?

Mrs. J. A. Cox, of Alderson, W. Va., writes: "My daughter... suffered terribly. She could not turn in bed... the doctors gave her up, and we brought her home to die. She had suffered so much at... time. Having heard of Cardui, we got it for her."

CARDUI

The Woman's Tonic

"In a few days, she began to improve," Mrs. Cox continues, "and had no trouble at... Cardui cured her, and we sing its praises everywhere. We receive many thousands of similar letters every year, telling of the good Cardui has done for women who suffer from complaints so common to their sex. It should do you good, too. Try Cardui. E-77"

She Is Brave Now.

In the Woman's Home Companion a writer says:

"Most people stand somewhat in awe of waiters, I find. They tip more than they can afford because they do not want to seem like a 'piker' in the waiter's eyes. Well, I am done worrying about what waiters are thinking about me. I make it a point now to let them worry about what I think about them. In the first joy of finding that I could get my rights by standing up for them I leaked to the captain of a dining car about the conduct of a waiter and later sent back some unripe fruit with perfect composure. The captain corrected the waiter. The unripe fruit was removed from my bill. It wasn't a bit of trouble. I didn't even raise my voice. But there was no mistake about what I meant."

"Since then waiters have had no terrors for me. When I don't get the treatment I ought to have I call the captain, or the head waiter, and ask what is the matter. He does the rest. And I tip regularly, but not lavishly."

President Fillmore.

Present day passion for setting unappreciated historical characters in a new light has now reached President Millard Fillmore. A symposium by sixteen American publishers says of him: He abolished debt imprisonment and religious test oaths for witnesses in court. He fostered new postage rates and induced congress to make an appropriation for testing the electric telegraph. He sent Perry on his famous expedition to Japan, with instructions for action that won the "open door" and laid the foundation for American-Japanese friendship. In his retirement as a citizen of Buffalo Fillmore laid the foundations of most of its present cultural institutions. Always he was an opponent of war and a constructive statesman. But he lacked those qualities as a man and those ambitions as a politician which might have made him popular while he lived and read about today.

Don't Neglect the Teeth.

The teeth are an important factor in maintaining health. Poor, irregular, decayed teeth cause foul breath and do not permit the thorough mastication of food. This creates intestinal disorders, caused by lumps of partly masticated food lying and fermenting in the stomach.

All food must be in a liquid state before it can pass into the intestinal tract, so if this task be continually imposed on the stomach it produces distress.

The mouth is indicative of character and as expressive as the eye. Refined and particular people do not neglect the appearance of the teeth.

A reasonable amount of care, a good dentifrice and a fairly stiff brush—all these give pearly teeth, a clean, sweet breath, ruby lips and a feeling of perfect cleanliness.

Floating Islands.

Many floating islands have at various periods been found voyaging on the Atlantic. These islands were originally part of the low lying river banks, which broke away under stress of storm or flood and floated out to sea. The Orinoco, the Amazon, the La Plata and other tropical rivers often send forth such pieces of their shores. Some of the bits of land are of large size and carry animals, insects and vegetation, even at times including trees. The roots of which serve to hold the land intact, while their branches and leaves serve as sails for the wind. Generally the waves break up these islands shortly after they put to sea, but sometimes, under favorable conditions, they travel long distances.

How Friends Are Made.

Two women with babies in their arms sat beside each other in a trolley car.

First one baby mumbled something, then the other until they became real friendly. Then one mother told the other how cute the babies got along together.

Before the car had reached the destination of the first woman each had invited the other to call.—Newark Eagle.

A Caution.

Reginald—I love you, Madeline. For you I would give up family, position, wealth. Madeline—Hold, Reginald! Giving up family is all right. I fear would be spared a mother-in-law. Give up your position if you can get a better one, but please hold on to your wealth. We may need it.

Helpful Shortcomings.

"Your husband is quite a trial." "Yes, but his shortcomings are useful in a way. After viewing him at close range our cook says she would never risk getting married. And we'd hate to lose her, that's a fact."—Kansas City Journal.

True.

"He still has the first dollar he ever made." "Well, that's better than owing now to somebody the last dollar you ever will make."—Detroit Free Press.

Her Explanation.

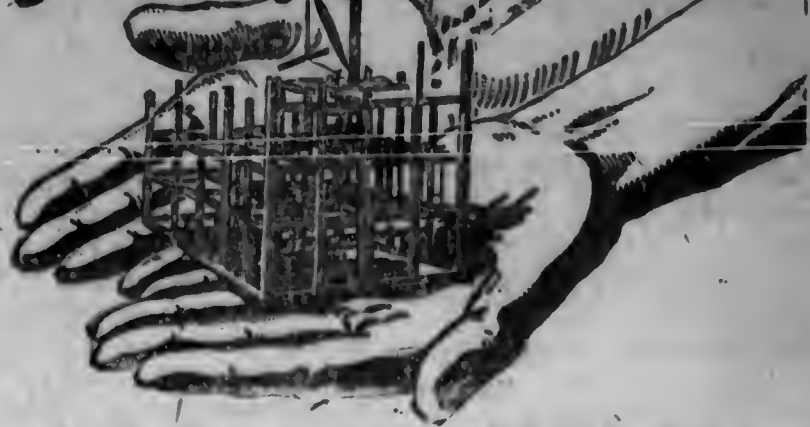

Mamma—Hazel, I thought I told you not to eat your candy till after dinner. Hazel—I'm not eating it, mamma; I'm only sucking the juice.

Her Preference.

"The doctor says he'll remove my appendix for \$1,500." "Oh, George, I'd much rather have a touring car."—Life.

There is nothing more pitiful than a life spent in thinking of nothing but self.—Farrar.

Have you a building job on your hands?

Now that prices are high it is more than ever important that you give careful consideration to the roof you are going to put on. You can save real money and get a better roof by using

Certain-teed Roofing

Thru quality and sheer merit as a roofing material CERTAIN-TEED is now being used as the preferable type of roofing for sky-scrapers, factories, hotels, stores, warehouses, garages, farm buildings etc., where durability is necessary.

It is economical to buy, inexpensive to lay and costs practically nothing to maintain. It is weather-tight, light weight, clean, sanitary and fire-retardant. It is guaranteed for 5, 10 or 15 years, according to thickness (1, 2 or 3 ply).

There are many roll roofings on the market, but only one CERTAIN-TEED. It pays to get the best. It costs no more to lay a CERTAIN-TEED roof than it does to lay a poor roof, but there is a vast difference in the wear. You can't tell the quality of a roofing by looks or feel. Your only safety is the label. Be sure that it is CERTAIN-TEED—then you are certain of quality and guaranteed satisfaction.

Certain-teed Slate-Surfaced Asphalt Shingles are supplanting wood and slate shingles for residences. They cost less, are just as good looking, wear better, won't fall off, buckle or split. They are fire-retardant, and do not have to be painted or stained.

Certain-teed Paints and Varnishes The name CERTAIN-TEED on a can of paint or varnish is the same guarantee of quality and satisfaction it is on a roll of roofing or a bundle of shingles. Made for all uses and in all colors.

SPECIAL METHODS TO INCREASE YIELD OF WHEAT

Specialists of the Department of Agriculture and the State Agricultural Colleges hope that by better methods the average yield per acre will be at least maintained wherever there is a fertilizer shortage and will be increased in other sections. Much educational work will be done to make this desire an actuality, and in this campaign the most successful growers will have a prominent part. For instance, it is stated that on the land that could be sown to fall wheat this autumn, it is possible materially to increase the yield per acre by putting into practice some principles that are already well known to most farmers. These should appeal especially to those who cannot increase their usual acreage without doing injustice to other crops which should be grown. These principles may be summed up as follows:

(1) Plow early. Give the plowed land two months to settle before

sowing where possible.

(2) Compact the late-plowed land with roller and harrow.

(3) Don't plow after a cultivated crop. Prepare such land with disk and harrow.

(4) Make the seed bed a fit place for the seed.

(5) Sow with a drill, sound, plump, clean seed of adapted variety.

(6) Prevent losses from smut by treating infected seed with formaldehyde.

(7) Make the soil fertile with manure or fertilizers applied judiciously where needed.

(8) Reduce winter killing by following the above suggestions.

The world passes the man who is trying to explain why he failed, so it can hold a mass meeting around the man who is telling how he made good.

The Golden Rule works both ways when it has a chance to work.

CLIPPINGS FROM THE SNAGTOWN TORCHLIGHT

GONE HENCE—Monday afternoon we received word that old John Ruddy of the White Horse Still had been found dead in his bed, and on hastening to the scene we discovered the report to be true. While the Coroner's jury returned a verdict of general collapse of the system, we think we know the true reason of his sudden taking off. Old John was an ambitious man. He didn't want to be postmaster but he did want to invent a new and thrilling moonshine cocktail which would be thoroughly identified with Arkansaw. In fact he wanted to shine in the moonshine line as brightly as we do in the journalistic. The compound he was after was to be known the world over as the "Coonshine Cocktail," and to be well worthy of this great and glorious commonwealth. To our own knowledge the deceased has been experimenting long before the state went bone-dry with whisky, brandy, cognac, champagne, cider, beer, wines, quinine, morphine, and various acids and drugs. On several occasions he has almost hit it. His own taste was to be the test, and we think the collapse was brought about by the action of so many decoctions on his system. Either that or he finally struck something that tickled him to death. He was not an angel, but he was enterprising and full of desire to help bring Arkansaw to the front, and it is needless to say that we were one of the pallbearers at his funeral Wednesday afternoon.

PASSING A COUNTERFEIT

Some one writes from North Carolina to Colonel Henry Watterson of the Courier-Journal asking him to correct an Eastern story-teller for making a Southern girl address a single person as "you all." Here is the Colonel's reply:

"It would be a waste of time. The Courier-Journal often has tried to set right these outside writers of Southern dialect, but some one of them some time got the idea that it was good Southern dialect to use 'you all' in the second person singular and the whole flock have been following the bellwether ever since. 'You all' as applied to more than one person is good English and it was used in Shakespeare. 'You all,' as applied to one person, is used only by would-be writers of 'Southern dialect,' who don't know what they are writing and is invariably copied from the ignorant work of other writers; never employed as the result of original, first-hand observation."

Can You Guess Who He Is?

A week's pass will be given to each of the first three persons handing in the correct name of the actor pictured above, tonight at The Tabb Theatre between 7 and 8 o'clock.

She Had to Move.

"It certainly was a mighty hot blaze when the church burned," said June Elvidge in speaking of one of the exciting scenes in "The Crimson Dove." "I know, because I was standing near the fire, and it was so hot that I had to move—quick!"

Hello, George! Hello, Marguerite!

At last! George M. Cohan, America's most popular star, in motion pictures! Having reached the very top rung of his theatrical ladder of success, not only as an actor, but as an author and producer, George M. Cohan has finally turned to the silent drama as a new field of conquest, so to speak. In order to display his very best efforts before the motion picture camera, the famous "Yankee Doodle Boy" selected his greatest stage hit, "Broadway Jones," as his initial vehicle in the motion picture field. The film has just recently been completed in Mr. Cohan's New York Studio and will be shown at The Tabb Theatre, this city, on Saturday, August 18.

Mt. Sterling movie fans will be pleased to know that Mr. Cohan will have as his leading lady in this his first photoplay, beautiful Marguerite Snow, who portrays the role of Josie Richards, the pretty stenographer at the Jones' chewing gum factory, and shows the wild youth the right path. Born in Savannah, Ga., and educated in Denver, Colo., Miss Snow became an actress at an early age. Following a notable stage career she achieved wide prominence in motion pictures, her characterization of the Countess Zudora in "The Million Dollar Mystery" being well remembered.

Star of "An Allen" at The Tabb.

George Beban and his company, during the filming of the Morosco-Paramount production of "The Marcellini Millions," which will be seen at The Tabb on Wed., Aug. 15, had, for a few minutes, the laugh on a local attorney. Later, the incident was not so funny. Mr. Beban's screen wife sues him for divorce, giving as a reason "incompatibility of temperament." That the papers might be properly drawn, a lawyer was employed and after three days the lawyer returned with four closely typewritten pages of legal matter pertaining to the case. It was pronounced by all who read it to be a masterpiece of legal literature, but only the word "incompatibility" was photographed. Beban and his company had a great deal of fun picturing the lawyer pacing the floor dictating this legal document and when he requested a private running for the benefit of some of his friends whom he had told of this masterpiece, he was granted the privilege. When only the word "incompatibility" was shown on the screen they all had a good laugh at the attorney's expense. But when the attorney presented a bill for \$12.00 the laugh was turned on the company.

What a jolt it would be to us photographers if some slacker, forced into service, should suddenly develop the genius of a Grant, or a Joffre, or a Hindenburg! But he won't. He'll be peering spuds in the kitchen.

TO SHIP 50,000 POUNDS OF ETHER TO FRANCE

In response to an urgent telegram from Maj. Grayson M.-P. Murphy, head of the Red Cross Commission in France, the Red Cross is planning to ship to Europe 100,000 one-half pound tins of ether.

Because of the shortage of anesthetics in France, the Red Cross War Council, in addition, has authorized Maj. Murphy to establish, as soon as practicable, a central plant to manufacture nitrous oxygen, or "laughing gas," one of the most effective and harmless of anesthetics for short operations.

American machinery will be shipped to France for this purpose, and American operatives will be sent over to conduct the plant.

Also, by reason of the shortage of surgical apparatus, the Red Cross has planned to establish in France a small factory for the repair of surgical apparatus and the manufacture of the more simple instruments. Four men expert in the repair of orthopedic appliances are to go to France immediately, and the necessary manufacturing machinery will be sent over as soon as it can be obtained.

GOOD MORNING

A cheery "Good Morning" often sends a ray of sunshine streaming through the innermost recesses of a household, resting there all the livelong day, and again follows hastening footsteps into the mart of business, lighting up and brightening the way of the world as it goes. A hearty "Good night" often soothes many a troubled mind to rest and heals the wounds which have either come anew to a struggling soul or been re-opened by the harsh words or deeds that are spoken or done in season or out of season, as the daily battle of our life progresses.

War hasn't all been transferred to the trenches. It still rages over the back fence.

FOR WORLD PEACE CONFERENCE

Representative Morgan, of Oklahoma, introduced a joint resolution authorizing the President to suggest a world peace conference. Under this resolution the President is "authorized and requested to address a joint communication to all the nations engaged in the present war, suggesting a world peace conference, to be held in some convenient neutral capital for the purpose of discussing terms of peace and of formulating a tentative draft of such terms, to be submitted to the belligerent Governments for their ratification or rejection." The President would be authorized also to suggest that neutral nations send delegates to such conference for the purpose of discussing the advisability of a world peace organization as a basis for establishing lasting peace.

No enlisted man in the Army, Navy, or Marine Corps could be sued in any court for any debt by the terms of a bill introduced by Representative Morgan, of Oklahoma.

An appeal for legislation authorizing the Secretary of the Treasury

to insure the lives of soldiers sent to France was made to the House in a speech delivered by Representative Poin, of North Carolina.

We know that music is pleasant, and home is not home where there are no songs or sweet harmonies; but a knowledge of the piano will not help a woman discharge her wifely duties, and a smattering of French or an ability to waltz gracefully will do but little towards preparing a palatable dinner for a husband when he comes home hungry.

GREAT RESPONSIBILITY

The members of the local Exemption Board have, in our judgment as great a responsibility as can be given to anyone, as they are virtually called upon to say just who shall and who shall not respond to our country's call for army service. In performing this service, it is natural that their decisions will not meet with universal approval, as no two cases are alike and all people do not see things the same. It is therefore highly proper that the public be careful in criticising the board or its decisions, at least until all the facts are known. Elsewhere, in this issue, appears an article giving an account of the actions of the Board to date. Under the law these rulings are subject to recall and all discharges stand automatically appealed in behalf of the government.

No one wants to see any particular person go, yet this war must be won and if it is to be won, we must have men. It is therefore absolutely necessary that Montgomery county furnish its proportionate part and those who have no dependents and are physically fit must, in our judgment, be the first ones called.

EXCELLENT LADY DIES

Mrs. Coleman Reid, aged 57 years, died at her home at Stepstone Friday night, death being caused by Bright's disease and heart trouble. Mrs. Reid had been in poor health for some time, but her condition had only been considered serious a few days prior to her death. She was a most excellent Christian lady and had long been a member of the Christian church at Antioch. She is survived by her husband and one brother, Mr. Tuck Lyle, of Milford, Ky. Funeral services were conducted Sunday by Rev. Clyde Darsie, assisted by Rev. Bonta. The burial took place in Machpelah.

AGRICULTURAL SHOW IN OCT.

Show Open to Farmers of Montgomery, Bath, Clark, Menefee, Bourbon and Powell Counties.

Plans are under way for a big agricultural exhibit to be given in Mt. Sterling the last week in October, and exhibitor's tickets will be sold up until September first, when it can be determined as to whether the show will be a success. Prizes for tobacco from \$300 down and for \$85 down for corn with other prizes for various farm products are being offered. There will be a woman's department also with good prizes, and every effort will be made to make the show one of the biggest and best advertisements and drawing cards the city and county ever had. Tickets giving the owner the right to show in 49 different exhibits will be sold at \$2.50 and every farmer and tobacco and corn grower in the county or section to which the exhibit is open should buy a ticket and get behind the movement.

These agricultural shows are being held all over the United States in various sections and do a world of good to boost the community in which they are held and to build up the agricultural interests. It is up to the farmers and those interested to join in the movement and help make it a success.

See W. Hoffman Wood, who has the matter in charge and buy a ticket now and help the movement get a good start. Mr. Wood has been urged by farmers and tobacco growers to start this movement and he should have the hearty co-operation of every person in this and adjacent counties. It is the plan, should the show sell enough tickets to make it a success, to have a band, decorate the large warehouse where it will be held, and make every effort to bring several thousand people to this city to see the exhibition. It means much to the city and county. Do your bit now.

Notice to the Public.

We wish to announce to the citizens of Mt. Sterling and surrounding country that we have again leased the well known Mt. Sterling Greenhouse, corner Clay street and Corbett avenue, and as usual will be prepared to furnish plants and cut flowers for all occasions, especial attention given to up-to-date funeral designs. We wish to thank our many friends and customers for their patronage and many kind acts shown us since located here. We hope for a continuance of same. Visitors always welcome. Very truly yours for more beautiful flowers,

BOMBS DROPPED IN ENGLAND

German airplanes on Sunday raided the southeast coast of England. Bombs were dropped at points in Essex and Kent, some distance from London. Twenty-three persons were killed, including nine women and six children, and nearly three scores were injured. British aircraft drove the Germans off and pursued them out to sea. Frankfurt-on-the-Main, about 160 miles within the German lines at Verdun, has been bombarded by French aviators in reprisal for German raids against Nancy and the region north of Paris.

U. S. GUNNERS

TAKEN PRISONERS

Sinking of the American steamer Campana, a Standard Oil tanker, with the probable capture of her captain and four members of the naval guard by the attacking German submarine, has been announced by the Navy Department. The capture of the four naval gunners made the first prisoners of the American fighting force taken by Germany.

"The Standard Oil tanker Campana, American steamer," says the statement, "was sunk by a submarine on August 6, 143 miles west of Illebre. Forty-seven survivors reached land in safety. It is believed that the captain of the steamer and four armed guards are prisoners on board the submarine."

The Campana was the thirty-eighth American merchantship destroyed through the operations of German and Austrian submarines and raiders since the war began. Thirteen of these ships were sunk before the United States entered the war April 6, 1917, and twenty-five since that time. The total tonnage of the ships lost is about 113,000 tons, including 64,000 tons sunk since April 6.

No American ship fell victim to

the Central Powers in 1914, and only two in 1915 and the same number in 1916. When Germany began her unrestricted submarine warfare, however, attacks on American shipping became more frequent and America lost nine ships between that date and the time the United States declared a state of war existed.

The first American ship sunk was the William P. Frye, Jan. 28, 1915.

GOVERNMENT READY TO TAKE OVER WHEAT CROP

The Food Administration is ready to buy the entire wheat crop of the country in order to insure a fair price to the producer and reasonable prices for bread and flour to the consumer, it was announced Monday when the Administration made public details of the plans. Beginning September 1 all flour mills of more than 100 barrels daily and elevators will be operated under license. Middlemen and grain exchanges are to be regulated. A fair price will be fixed. The statutes against holding large quantities of grain where not needed in the conduct of the business of the holder will be strictly enforced. Exports are to be limited to wheat not needed for domestic use.

MISS FROST GRANTED LEAVE OF ABSENCE

Miss Margaret Frost, local Community Nurse, has been granted a leave of absence for one year by the Montgomery County Health and Welfare League in order that she may join the hospital unit which is being organized by Dr. David Barrow, of Lexington. The Health and Welfare League has been so satisfied with the work of Miss Frost that they decided to grant the leave of one year instead of accepting a straight resignation in the hope that through some turn of events, Miss Frost might be able to resume her work here. The League has several nurses in view to fill Miss Frost's place and a selection will probably be made in the near future in order that the new nurse may arrive and become familiar with her local duties while she has the guidance of and before the departure of Miss Frost, who is expected to leave with the rest of her unit about Oct. 1st.

There will be a pie supper at the Pine Grove school house August 18, nt 7:30. Everyone is cordially invited.

BRENT G. NUNNELLEY GETS COMMISSION

Mr. Brent G. Nunnelley, formerly a Mt. Sterling boy, who married a daughter of Mr. and Mrs. W. P. Apperson, of this city, has been given a commission as First Lieutenant at the Officers' Training Camp at Fort Oglethorpe, located at Atlanta, Ga. This makes the second Mt. FOX HUNTERS TO MEET AT OLYMPIAN SPRINGS

Olympian Springs, Bath county, has been selected as the place and the week of November 19 as the date for the annual hunt of the National Fox Hunters' Association. This decision was reached at the annual meeting of the executive committee, held in Lexington. Practically all members of the committee and quite a number of well known devotees of the sport were present and participated in the discussions relative to this year's proposed meet, which it is planned to make one of the most successful in the history of the organization. Last year the annual hunt of the national association was held at Columbia, Tenn., and it is gratifying to all Kentucky lovers of the chase that the executive committee decided to bring this year's event to this State.

OCEAN TO OCEAN CAR PASSES THROUGH THIS CITY

An automobile bearing a message from President Wilson to the Governor of California, passed through this city last Wednesday afternoon. The trip is a relay affair and quite a number of cars will be used in making the journey. The object is to advertise the Midland Trail and quite a little interest was manifested in the passing of the car through different points, and there is much speculation as to the number of hours it will take to make the trip.

THE GIANT AWAKE

We have but recently witnessed an event in this country the like of which the world has never before seen—at least, the world of our knowledge. We have witnessed the entrance into the ranks of a nation's fighting men, of ten million soldiers, waiting for the call to the colors. We see today an army of nearly two million men actually under arms, equipped and assembled, ready to do or die in their country's service.

It is an amazing sight. America, the peaceful; America, the cradle of toleration, the nursery of justice and right—America in arms and springing to the fray!

And the strange feature of the case is, it has astonished even Americans themselves. We had been so long accustomed to hear ourselves referred to as a sleeping giant that we had come to so regard ourselves. We had thought that the affairs of the outside world concerned us not, and that we were sufficient unto ourselves.

But today sees the giant awake. A little groggy, it is true, but rapidly assimilating the power and might that will sweep everything before him when once he gets his stride. It also sees him shorn of his provincialism and taking his rightful

place in the world—a man of power and might among men of power and might.

And being awake, we find confronting us one of the most stupendous tasks that ever confronted a people. We find ourselves the probable deciding factor in a world war, the balance of power that shall make this earth a safe place of abode for all men—a world in which RIGHT, and not MIGHT, shall reign.

And with this great task before us, we are going about our preparations as befits a people who have not only confidence in their own powers, but a full appreciation of the magnitude of the task as well. While we have not proclaimed it broadcast, yet deep within the hearts of our people there is a firm determination that the sword shall not be sheathed until the cause of humanity has triumphed over the forces of oppression and tyranny. There is but one sentiment heard from the lips of all loyal people: "We MUST win."

Therein lies the meaning of the quiet, deep, but deadly purpose of our people. We must win for humanity's sake. And when were our people ever called upon to perform a task for humanity, that they

failed.

Our millions who have answered the call have come cheerfully. They have stepped forward with the fullest appreciation of the work before them, but also with supreme confidence in their ability to perform that task. This is the spirit that conquers, and it will conquer in this instance.

Soldiers of America, never in history could it be more truly said that "the eyes of the world are upon you."

NEW CLUB ORGANIZED

A new club, to be known as the Woman's History Club, is to be launched in Mt. Sterling during the month of September. Already there are pledged for active membership 45 earnest women of Mt. Sterling, and each year more members are to be admitted. It is expected that the club will develop departmentally as its grows in size, and the study of music, art, civics and philanthropy will afford opportunity for interested women to contribute their talents toward the progress of the community. Such an organization as this should fill a long-felt need in the town and should be a development to be proud. The basis of the first year's work will be the study of China and general current events. The following women are to be the initial officers: President, Mrs. A. B. Oldham; 1st vice-president, Mrs. John S. Frazer; 2nd vice-president, Mrs. John J. Walsh; corresponding secretary, Mrs. J. C. McNeill; recording secretary, Mrs. Henry Senieur; treasurer, Miss Rannie Burroughs.

DENIES RUMOR OF DISASTER TO UNITED STATES FORCES

Answering rumors as to an alleged disaster to American forces, Secretary of War Baker, made the following statement:

"I have no hesitancy in saying that not a syllable has reached the War Department which would lead us to believe that any misfortune has attended our forces on land or sea, and I can reiterate the pledge made some time ago that any such word will be instantly given to the country, subject only to the qualification that any military movement in process at the time be completed, so as not to imperil the remainder of the forces involved. Let me repeat that no word has reached us which would justify any fear at this time."

Painting a Battleship.

One hundred tons of paint, costing approximately \$25,000, represents the initial color requirements for a new battleship. The annual upkeep cost may exceed this sum, since it is the custom to repaint the different parts of a modern war vessel every three to six months. This would indicate an annual paint protection outlay of nearly \$1,000,000 for the navy. If to this sum is added the cost of painting the thousands of lake boats, freighters, river steamers and pleasure craft some conception may be had of the importance of marine painting.

Among the most important naval paints are those which are applied to protect the submerged parts of the hulls from corrosion or fouling by barnacles. The word barnacle is the popular name for that form of marine crustacea which consists of a clam-like body lodged in a shell that is often formed in a series of rings or plates. They adhere with great tenacity. Without anti-fouling paints the speed of vessels would be greatly retarded by the piling up of a thick incrustation of barnacles and attached sea grass.—Boston Herald.

Vegetable Soups or Purees.

Soup is not necessarily made from meat stock. Vegetable soups or purees are made by boiling potatoes, beans, peas or other vegetables until soft, mashing through a sieve and then heating with a little liquid (water, milk, soup stock or whatever seems desirable) and flavoring. Using leftover vegetables for such purposes is an economical practice. Milk soups, which are really milk thickened and flavored with some vegetable, fish or other food, to give flavor and perhaps thickened still more with a little flour or stale bread crumbs, are both nutritious and appetizing. They furnish also an excellent means of using up skim milk. Those who wish to bring down the cost of food should remember that skim milk, a cup of which contains as much protein as a cup of whole milk, is far too valuable a food to be overlooked.

Walnuts as Food.

The ancients held the walnut in high esteem. Mortals could and did exist on acorns, but walnuts were so delicious in taste and flavor, so palatable and nutritious, that they were revered as food only for the gods to dine upon. Modern investigation and modern customs have popularized the uses of the walnut to such an extent that it is now regarded not only as a luxury, but as a food of great nutritive value. A chemical analysis of the nut shows that it is six times as nutritious as meat. No vegetable or fruit, with the possible exception of the olive, can be compared with the walnut as a strength giving and fat producing food. All nuts are possessed of elements of nutrition, but the highest in rank is the walnut.—Manchester Guardian.

Magnetic Metals.

Magnetic properties are not confined to iron. Alloys made from various combinations of metals—copper, manganese, tin, aluminum, bismuth and some others—show more or less marked magnetism. Recent work has shown that the highest amount of magnetic power among ironless alloys is obtained by mixtures of copper and manganese plus either aluminum or tin. It is difficult to explain why such alloys should be magnetic.

Fluent Women Novelists.

Several women novelists beat the men as public speakers. Mrs. Bailey Reynolds is a beautiful speaker; Mrs. Humphry Ward is equally fine; Lucas Malet says just what she desires to say, and Sarah Grand might get a seat in the cabinet if she were a man, says the London Answers.

What It Was.

The small boy was the first to answer the telephone. The person on the other end of the wire was a friend of his mother, and the following conversation ensued: "Is this Mrs. Blank's residence?" "No, ma'am; it's Mrs. Blank's little boy."—Exchange.

Rich and Poor.

If you desire not to be too poor, desire not to be too rich. He is rich not who possesses much, but who covets no more, and he is poor not who enjoys little, but he who wants too much.

Modern Plays.

"The average modern play," said a playwright, "calls in the first act for all our faith, in the second for all our hope and in the last for all our charity."

PRACTICAL HEALTH HINT.

Medicinal Value of Apples.
People ought to know that a good thing is to eat apples just before retiring for the night. Persons uninitiated in the mysteries of the fruit are liable to throw up their hands in horror at the visions of dyspepsia which such a suggestion may summon up, but no harm can come even to a delicate system by the eating of ripe and juicy apples before going to bed. The apple is excellent brain food, because it has more phosphoric acid in easily digested shape than any other fruit. It excites action of the liver, promotes sound and healthful sleep and thoroughly disinfects the mouth. This is not all. The apple prevents indigestion and throat diseases.

HOW WILL IT BE RAISED?

In discussing the question of raising the enormous amounts of revenue necessary during the coming twelve months, an exchange, after demonstrating the utter impossibility of raising the vast amount by taxation, and the corresponding necessity of resorting to bond issues, concludes as follows:

"In a sentence, unless the big loans are balanced with heavy taxes upon those who are making money out of the war, we will rapidly and inevitably reach a state of financial, industrial and social chaos."

The conclusion is inevitable to the candid person who will give the question unbiased thought.

Based on the probability of a need of from fifteen to twenty billion dollars by this time next summer, the demand would mean from \$600 to \$750 for each of the twenty million families that make up the nation. It can be seen at a glance that this can never be even approximately distributed among the masses. Possibly a few more billions may be secured through popular subscription, but the great bulk of the required means must come, as our contemporary suggests, from those who are MAKING MONEY OUT OF THE WAR.

If the war continues for even two years longer there will be fortunes made that will dwarf any the world has yet seen, provided business is allowed to take its hitherto uninterrupted course. While it is true we will spend prodigious amounts, it is equally true that we will make fabulous amounts. The allied nations are practically at our mercy for food and other supplies. Huge revenues are constantly coming from that source. Not a dollar's worth of any commodity that can be used by man need go to waste in the United States for want of a foreign market.

It is up to our government to correctly analyze the situation and

place the burdens of taxation to meet these great national expenditures upon the shoulders of THOSE WHO BENEFIT BY WAR PRICES.

Will our law makers arise to the occasion and make an equitable adjustment of these burdens? Along with some very common, we have some really good timber in our national legislature, and it is to be hoped that this material will insist upon a reasonable and just basis for working out this momentous question.

At Last—A One-Adjustment Cream Separator

BEFORE you buy any cream separator, come in and look at the Primrose. One adjustment is all that is necessary to keep it in perfect operating condition at all times. This adjustment is a simple one for keeping the bowl at the correct height—an adjustment that you or your wife can safely make, whenever it's necessary.

The adjustment is made from the outside of the separator by either raising or lowering the bearing containing the hardened steel point, upon which the spindle revolves. A slight turn with a screwdriver, perhaps once a year, does the work. The Primrose is a well-constructed, close-skimming, durable cream separator. It will make a saving of \$10.00 to \$15.00 per cow in your herd every year. It is made in four sizes to separate 350 to 850 pounds of milk per hour, or from about 40 to 98 gallons. Ask for a catalogue giving a complete description, or, come in and look over the Primrose yourself.

LAWLESSNESS

There is much food for thought in the nets of lawlessness in different parts of the country. Are we as a people losing respect for the law? Are we losing sight of the fine ideals we have cherished for a century and a half? Or is the unrest so prevalent in other parts of the world communicating itself to us?

The most disquieting feature of these outbreaks of lawlessness is not that they should have occurred, but that they should occur just at this time, when the country needs to be united in heart and soul as never before.

In times of peace and calm the good sense and orderliness of the people would not have tolerated the causes which led up to the disturbances. With the minds of the people on other matters these causes have been permitted to grow and flourish.

While we are proposing to make great sacrifices for freedom, let us not permit a growth within our body politic that is calculated to nullify and make impotent that freedom.

Let us get our own house in order.

SAM GREENE DEFEATED

Judge Samuel Greene, of Louisville, was defeated for renomination as County Judge of Jefferson county in the primary Aug. 4th by Lorraine Mix. The defeat of Judge Greene causes sincere regret to friends here at his old home. He is a son of Mr. Lucien Greene, of this county, and a brother of County Clerk Keller Greene. Judge Greene's defeat is attributed to his support of Gov. Stanley.

IT CONCERNS ALL

The man, woman or minor who is not concerted as to the outcome of the present struggle is to be pitied and enlightened. He or she is really unconcerned through ignorance. They have failed entirely to grasp the true inwardness of the situation confronting us as a people.

Let us suppose that the history of our country were to end with the present generation. Does any one imagine that our statesmen would be materially interested in the settlement of the questions in dispute? Hardly.

Naturally, then, it is mainly the future of the country that is to be considered. What that FUTURE is to be will depend upon OUR ACTION NOW.

It is to the credit of the American people that they have always had a clear vision of the duty of the present generation to posterity. That vision was responsible for the Revolutionary war. It was the stimulus in the war of 1812. And when the Mexican question assumed grave proportions the same thought was at the fore in the national mind. Not so much the interest of our own posterity as that of our fellow man was the stimulus in the brush with Spain. But throughout her whole life this country has never failed to place the true interests of posterity before present ease and comfort.

What can be said, then, of the young man or woman who is not concerned over the outcome of this struggle? That they have no concern for the best interests of their own. Present ease and comfort weighs more with them than the future of their children, or of the race in general.

No nation of people can ever come into their own until present can be subordinated to future. No present is ever entirely what it should or could be. By the sacrifice of the present we stand a chance of realizing on the future. If all else is to be subordinated to the present, there is every possibility of there being no future worthy of the name.

Beware of the man with an excuse. That's all he is—an excuse.

Fighting in the Air.

"Before an aviator is prepared to engage another flyer in battle he should know how to loop the loop, do a nose or vertical dive, execute a tail spin, a tail slide or any other of the so called stunts," said Miss Ruth Law.

"Fighting in the air is fighting for position. Consequently it is largely a business of dodging. The man who is the better dodger, who has the most tricks up his sleeve, is the man who is going to win. I have seen men stop controlling their machines altogether and simply fall through space for several thousand feet.

"The point of this, of course, is to give the opposing flyer the idea that the plane has been struck. The opposing aviator, thinking he has put his enemy out of commission, will start away. Then the plunging air man will switch on his power, regain control of his machine and overtake his enemy without the latter knowing he is approaching. Such tactics naturally are used at great altitudes."—New York Tribune.

Haydn's Ox Minuet.

Haydn one day received a visit from a butcher who said that himself and his daughters were admirers of Haydn's music, and as the young woman was soon to be married he made bold to ask that the composer write a minuet for her wedding. Kind "Papa Haydn" consented, and in a few days the man of meat obtained his music. Not long afterward Haydn was surprised to hear this same minuet played under his window. On looking out he saw a band of musicians forming a ring around a large ox tastefully decorated with flowers. Soon the butcher came up and presented the ox to Haydn, saying that for such excellent music he thought he ought to make the composer a present of the best ox in his possession. Ever after this little composition was called the "Ox" minuet.—W. Francis Gates in "Anecdotes of Great Musicians."

For Chess Players.

The Swedish monarch, Charles XII., found himself besieged by the Turks and virtually a prisoner. To while away the tedium of his captivity he would indulge in an occasional game at chess—even when Turkish bullets were flying around—with his friend Grothusen. The position beneath had been reached when Charles exclaimed, "I have a pretty mate in three!"

White—K on K B 5, R on K K 1, Kt on K 4, pawns K Kt 2, K R 2. Black—K on K R 4, B on K B 7, pawns K R 3, K K 1 6. But even as he spoke a flying bullet sent the knight to smithereens. The king, undismayed, merely remarked, "Now I mate in four." Before Grothusen had solved the position another bullet sent White's rook's pawn spinning off the board. Charles' only comment was, "I can now give mate in five!"

Strangled the Tree.

A Victoria clergyman had an orange and a plum tree in his garden. One spring it was noticed that the orange tree was drooping, and on digging down he found that the roots of the plum, which stood at some distance, had twisted around the taproot of the orange tree and were strangling it to death. The offending roots were untwisted and cut away, and the drooping plant revived. The tree eventually died. Then on digging down at a greater depth the clergyman found the plum had attacked the orange root lower down and accomplished its murderous end.—London Graphic.

The Fertile Rock.

Gibraltar is often called a barren rock, yet it has 450 species of indigenous flowering plants. Castor oil plants, daturas and daphnes attain the dignity of trees and geraniums and hellebores the proportions of hedges. These floral delights often conceal cannon and other armaments. The few snakes that are found are small and harmless. Lizards several inches long are often seen.

Licorice Root.

Several thousands of tons of licorice root, which is considered a pest and worse than worthless by the natives generally, are annually gathered in Turkey for exportation to this country for use in the manufacture of chewing and smoking tobacco as well as for flavoring confectionery and beer.

HOW TO SEND MAIL

TO MEN IN ARMY TOLD

Postal rules for the transmission of letters, parcels, and papers to men in the armies of the United States in France have been announced, and all persons who, desire to communicate with men are urged to observe them strictly.

The proper method of address to a soldier is this. "John Smith, Company B, 24th Infantry, American Expeditionary Forces," and the name and address of the sender should in all cases be placed on the envelope or wrapper. In no case should the writer attempt to designate the location of the unit to which the soldier belongs.

Letters, newspapers, and parcels may be sent at the domestic rates of postage to all soldiers and civilians connected with the Expeditionary Forces in Europe.

Parcel post will be sent at the eighth zone rate of twelve cents a pound, with a maximum weight limit of twenty pounds. This applies only to ordinary parcel post, no C. O. D., insured, or registered packages being handled.

Money orders may be sent at the domestic rate.

No money or valuables can be sent by registered mail.

The domestic rate of postage will apply on all letters from soldiers abroad engaged in the present war. Such postage may be paid by the soldier at field post office, or the postage will be collected from the recipient of the letter in this country at the single domestic rate, if not prepaid abroad.

Magazines bearing the following official authorization—

"NOTICE TO READER"

"When you finish reading this magazine place a 1-cent stamp on this notice, hand same to any postal employee, and it will be placed in the hands of our soldiers or sailors at the front.

"No wrapping—no address.

"A. S. BURLESON,

"Postmaster General."

can be mailed at any post office, unaddressed and unwrapped, by simply placing a 1-cent stamp on the magazine, regardless of its weight. Only magazines bearing the official notice and not addressed to any individual can receive this mailing privilege.

LLOYD FRAZER IN ENGLAND

Mr. and Mrs. John S. Frazer received a cablegram last week from their son, Mr. Lloyd Frazer, announcing his safe arrival in London, England. Young Mr. Frazer has been connected with the Standard Oil Co., in South Africa for several months and recently advised his parents that he was going to England to join the American forces and go to the front in France. His cablegram is the first message his parents have had for some time and it greatly relieved their fears.

SNAGTOWN ON THE RUN

A soldier of the Legion lay dreaming in Geewhiz;

There was never lack of glory for that hero heart of his;

But a fair face bent above him, as he snored the time away,

And he heard a low voice whisper: "John, the gas bill's due today!"

The dreaming soldier faltered as he heard that voice so bland,

And he said: "Thank heaven, no more I'll see my own—my gas bill land!"

Take a message to my creditors, and comfort them with it,

For I was born for Glory—for Glory on the Grit.

"Tell my tailor and my grocers as they meet and crowd around

To figure up their losses on the old, abandoned ground,

That I hit the grit full bravely, and ere the day was done

I was fifty miles from Snagtown—from Snagtown on the Run.

"Tell my bankers not to weep for me when on my notes they gaze

And find the weather dampened with the dues of thirty days:

But to 'figger' on 'em bravely from morn till set of sun,

For I was born at Snagtown—at Snagtown on the Run!"

And the calm moon she rose slowly, and calmly she looked down

On the soldier there at Geewhiz, long miles from old Snagtown;

Tes; calmly o'er his slumbers her journey she begun,

As she shone on those who mourned him at Snagtown on the Run.

Crops are reasonably good this year, including that of inventive geniuses who can end the war by the pressing of a button.

TRUSTEE UPHELD

Ray Moss, trustee of the Camargo consolidated school, was granted an injunction against the County Board of Education to prevent them from selecting and employing the teachers of that school, by County Judge W. O. Chenault Monday morning. It is said the county board has employed the teachers without consulting the trustee and suit was brought to enjoin them from teaching except with teachers selected by the trustee. The case will be appealed. It is not known whether or not the school will close until the case is finally decided.

THE FAIR

STREETS NEARLY FINISHED

The Carey-Reed Company, of Lexington, which is building several new asphalt streets here, will complete the work this week and move the machinery to other sections of the State. The streets which have just been completed are East Main, from Wilson to Queen; Sycamore, from the railroad to Holt avenue, and High street, from Broadway to Elm, giving the city several miles of asphalt thoroughfares.

LIGHT SHOWERS

Light showers fell in some sections of this county Monday morning, greatly helping corn, tobacco and grass, but a heavy rain is badly needed. The shower was confined to only a few sections of the county. Corn especially needs rain at this time and a downpour this week would insure a big corn crop in every section and would also help tobacco considerably.

16 TO 1 CHANCE SOLDIER WILL NOT DIE IN FRANCE

Oscar Babson, statistician, sends this message to mothers of soldiers from his studies of figures of the French army:

Don't worry if your son is drafted. Fifteen men out of every sixteen have been safe from death this far. Under present conditions, where man power is being saved, not more than one in thirty is killed.

Disease has taken no more than in peace times.

Only one man in 500 loses a limb, a chance no greater than in hazardous occupations at home.

Giving the matter further thought, Babson decided that it was the right of every conscripted young man, every volunteer, and the mothers and fathers of both, to know just what chances soldiers take. So he has arranged publicity for the result of his investigations.

Babson's conclusions are based on the mortality figures of the French army during the full three years of the war. It should be remembered that the present fighting is not resulting in anywhere near the number of deaths that occurred during the first two years, when such battles as that at the Marne, at Ypres and at Verdun sent the mortality rate soaring.

In short, the war has resolved itself into one of attrition; each army is trying to wear the other down without losing itself any more men than necessary. There is no reason to believe that this method of fighting will not continue when our troops reach the firing line. If it does, the chances of an American soldier returning safe and sound are even better than that quoted.

"In the first place," Babson said, "the terrible disease scourges which used to raise havoc with armies in the field are no more. Cholera, dysentery and typhoid no more take a horrible toll from the ranks; modern methods of sanitation and prevention have made these things of the past."

"Let's take a look at the figures in the matter. In round numbers, 5,000,000 men have fought under the banner of France since the beginning of the war. Of these approximately 60,000 have died from diseases of various kinds; comparing these with the mortality figures of peace times for men of the same ages, we find that they are about the same. Remember, that during the first months of the war, before it was possible to care properly for miling soldiers, deaths were at a terrible rate, which brought the rate for the three years much higher than it is at present. So under present methods of sanitation, a man is not as likely to die from disease in an army as he is at home."

"About 960,000 men in the French army have been killed or died from wounds during the three years of war; half of these died during the first year. But in compiling the statistics, we'll take the average, which is 320,000 per year, or about one-sixteenth of the total number engaged. Thus, considering a man in this war for one year, he has fifteen chances of returning home to one of being killed."

15,000 MINERS STRIKE

All miners in the Nineteenth district near Middlesboro are on a strike. The operators are firm in their determination not to recognize the union, which seems to be the chief contention. United States Marshals and Secret Service men are known to be in the field and there is some apprehension that all the mines of that section may be taken over by the Government if it is apparent there is no chance for an agreement. There are said to be about 15,000 strikers.

WHEN MA IS SICK

When Ma is sick
She pegs away;
She's quiet, though,
Not much to say.
She goes right on
A-doin' things,
An' sometimes laughs
Er even sings.
She says she don't
Feel extra well,
But then it's just
A kind o' spell.
She'll be all right
Tomorrow, sure,
A good old sleep
Will be the cure.
An' Pa he sniffs
An' makes no kick,
For women folks
Is always sick,
An' Ma she smiles,
Let's on she's glad—
When Ma is sick,
It ain't so bad.

WHEN PA IS SICK

When Pa is sick
He's seared to death,
An' Ma an' us
Just holds our breath.
He crawls in bed,
An' puffs and grunts,
And does all kinds
Of crazy stunts,
He wants "Doc" Brown
And mighty quick;
For When Pa's ill
He's awful sick.
He gasps and groans,
An' sort o' sighs;
He talks so queer,
And rolls his eyes;
Ma jumps an' runs,
An' all of us,
An' all the house
Is in a fuss.
And peace and joy
Is mighty scarce—
When Pa is sick
It's something fierce.

The Ewing Fair.

The Twenty-fourth Annual Meeting of the Ewing Fair and races will commence on Thursday, August 16, and continue for three days. The program is bigger and better than ever. Many new departments have been added this year, of which the Hog Department is not the smallest in the least. One of the best bands in the state will furnish the music, and Littlejohn with his United Shows, nine carloads, accompanied by his famous Italian band, makes this one of the biggest years this company has ever undertaken.

Thousands of people from adjoining counties will attend this year, and the company has made preparations to take care of larger crowds than ever before. Get the habit of attending the Ewing Fair, for there you will see old faces you have not seen for years, and old sweethearts who have wondered what has become of you, and have waited all these years feeling that you would come back. Come to Ewing the three big days and see one of the biggest Fairs in the state.

Crab Orchard.

A flag raising ceremony was one of the features of the past week at Crab Orchard Springs when a handsome flag was presented by John B. Hundley, for forty years general bookkeeper of the Bank of Kentucky at Louisville.

A patriotic address was made by Judge Louis Walker, of Lancaster, after a band played a number of national airs. Eugene B. Yates, of Georgetown, acted as master of ceremonies, and John Francis Cannon, the young son of L. G. Cannon, of Scott county, entwined in the Stars and Stripes, raised the flag to a staff thirty feet higher than any one in Kentucky, which floats to the breeze 135 feet above the earth. Mrs. E. C. Hulien, of Horse Cave, a public reader, gave "The American Flag," by Joseph Rodman Drake. The invocation was given by Rev. Dr. Morgan, of Crab Orchard.

Master Cannon is the little grandson of Mr. and Mrs. John W. Lockridge, and has been spending the summer at Crab Orchard Springs with his parents, Mr. and Mrs. L. G. Cannon.

THE HOME

Home should be made the most interesting and best loved spot on earth, not merely four square walls of wood and brick; it should be the fountain of civilization, the very word should touch every fiber of the soul and strike every word of the human heart with its angelic fingers, a place where that is centralized on the higher and better things of life, bringing forth in the highways and byways an influence that will be felt by all with whom it comes in contact. It should be a place where our feet may leave but not our hearts, a place where angels unfold their wings, the place we love best, because it is the place where mother is.
